1. Purpose

Learning in the 21st Century is an active process in which student-centered, self-directed, personalized and peer to peer approaches are critical to the future of education. Nowadays, students of all ages are eager to be engaged in the learning process. The traditional models of knowledge transfer from an expert teacher to a student in a formal classroom environment have been replaced by technology support.

The theme of ISAGA 2018 is “Active Learning and Neo-Simulation & Gaming: Sharing Wisdom” and its aim is to bring together a multi-disciplinary gathering of practitioners and researchers from public and private sectors to share their experiences and insights into the role and projected future of the latest simulation and gaming applications applied to the domain of learning and development. ISAGA 2018 itself will employ neo-simulation and gaming within the conference as a practical and engaging experience that aims to provide a lasting learning legacy for all its participants.

2. Areas of Interest

Any areas related to simulation and gaming. See examples below:

- a. Design of S/G (Simulation & Gaming) in board games, card games, and other formats and approaches
- b. Facilitation & Debriefing of S/G
- c. S/G to test and develop theories in social science and variety of domains and applications
- d. S/G for practical design of environmental, social, industrial, and political projects and applications
- e. S/G for crisis management, risk management, and natural disaster management
- f. S/G applications in language, communication, science, history, business management,

logistics, supply chain, and other disciplines

g. S/G in active learning, experiential learning, skill development, and learning outcomes

h. Applications of S/G in computer-assisted, internet-based, AI-based, and other cutting-edge technological platforms

i. Experiences in using S/G in South East Asia
